

January 30, 2013

To All Arena Users,

Community Services, Arena Operations is committed to ensuring high standards of health, safety, and welfare for all of our patrons who may be affected by our activities.

Starting February 1, 2013, we will be applying a new safety requirement that impacts the use of all player boxes.

New Safety Requirement

Before the ice resurfacer begins to complete a flood, coaches and instructors are asked to remove all items from the top of the rink boards and have all players exit the players' boxes.

This new requirement will ensure floods are completed in a safe timely manner eliminating incidents of arms and sticks coming in contact with the ice resurfacer, pucks being thrown on the ice, and items falling off the top of boards into path of the ice resurfacer.

We ask for your support in adhering to this new requirement. Should you have any concerns regarding this new requirement please contact the Arena Crew Leader. Please ask the Arena Staff for the Crew Leaders contact information.
